ACI CELEBRATES 25years

Proud Member:

**AIRPORTS COUNCIL
INTERNATIONAL**

25 YEARS
1991 2016

The first commercial flight took place just over 100 years ago. In the time since, civil aviation has evolved into a complex system that connects people and business the world over and contributes billions to worldwide GDP. The pace of change within the industry has accelerated over the last quarter century, and Airports Council International has evolved in step.

We invite you to watch this video (cut and paste link in your browser) <https://www.youtube.com/watch?v=uejS-GPCcJg>, detailing the exciting progress that ACI has made over the last 25 years as **"the voice of the world's airports."**

TRAVEL ADVISORY

YELLOW FEVER ALERT | GET THE FACTS !!!

Yellow fever is an acute viral hemorrhagic disease transmitted by infected mosquitoes. The "yellow" in the name refers to the jaundice (yellowing of the eyes) that affects some patients.

Symptoms of yellow fever include fever, headache, jaundice, muscle pain, nausea, vomiting and fatigue. A small proportion of patients who contract the virus develop severe symptoms and approximately half of those die within 7 to 10 days. The virus is endemic in tropical areas of Africa and Central and South America.

Yellow fever is prevented by an extremely effective vaccine, which is safe and affordable. Travellers are being alerted and advised to take precautionary measure when travelling to and from Yellow Fever infected countries. Before travelling to or from at risk countries, ensure that you consult your doctor to receive your Yellow Fever Vaccination and your immunization certificate as proof of vaccination. Use mosquito repellent which contains DEET. Use a Mosquito net when sleeping, avoid wearing scantily clad clothing.

Passengers travelling (including airport transit) from countries listed below are required to have evidence of Yellow Fever Vaccination and present to the health officer before permission is granted for landing by immigration.
